Like the new academic standards, the tests are fundamentally different from the old exams, and no reliable comparisons can or should be made between the old and the new tests. This year’s test results will help establish expectations for progress over time (a baseline). They also include growth. The new assessments include computer-based tests in English Language Arts and Math. The tests are an academic checkup, designed to give teachers the feedback they need to improve instruction.

The tests are part of a comprehensive assessment system that will be used by schools each year. The implementation of the new academic standards anticipates that the new tests will be more rigorous and will better measure what students know. They are based on a new model of testing that’s a system of four levels, true/false, multiple choice, open-ended, and performance tasks. Each test is designed to help students understand the correct answer and how they arrived at it. These tests are faster and more secure than paper tests. These online tests are faster and provide a more comprehensive picture of how students are progressing over time as teachers and students become familiar with the new standards and tests. The ELA tests are a key part of a comprehensive assessment system being rolled out over the next year that supports the implementation of the new academic standards adopted by California. This isn’t just a new test, it’s the implementation of the new academic standards trying to prepare for college and the 21st century job market. These new assessments set a higher bar to ensure that California students are better prepared to succeed in the future.

Parents are valued partners and can play an important role in preparing students for success. Parents can help students become better adults who are successfully navigating this world, they have to learn how to use and apply this information in flexible ways. This means learning to combine information and convey it in both口头 and written works. Parents and students should try to create more of a routine regarding reading and writing skills.

California has adopted more rigorous academic standards and thus it makes sense that California students should be more prepared to succeed in the future.
